GARAGE AUTOMATION

Software Boys

The parking process will be streamlined with our system.

THE FUTURE OF PARKING

The user application provides customers with a convenient way to manage their data. Through it, customers can access the navigation system, add payment methods and review past parking sessions. The entire interface was built around simplicity to avoid any distractions and to streamline the parking process as much as possible

- 1 Register for an account
- 2 Add a payment type and add a vehicle
- 3 You are all set up!
Enter a parking lot supported by our system

PARKING MADE EASY

The parking application provides managers with a convenient way to manage the parking lot data. The manager is able to access the parking lots and review the customers in their lots. The manager can readily and easily manage their parking lots.
